

## Seats

A seat is a strong, strong surface to be seated, normally raised above floor level. Typically utilized by a single individual, nearly all seats are on the support of four legs, even if a few can be in a triangular shape with just three legs. A stool is a kind of seat which does not have any arm rests or a back rest. A seat that has folding action and an inclining footrest is referred to as a recliner, whereas a seat along with arms only is considered an arm seat. If a seat has attached wheels, it can be referred to as a wheelseat and if the seat is hung from above, it is called a swing. A permanently attached seat in a train or a theatre is referred to as a seat or airline seat, yet when riding; it is a saddle as in bicycle saddle. A car seat is the type utilized within cars and an infant car seat would be a seat specifically designed for young kids.

The design of the seat could differ somewhat significantly in order to accommodate many aesthetic tastes and requirements. As an example, designs can be decorated with drilled holes, can consist of gaps or low backs for ventilation or be made of porous materials. The seat back could be designed as an included headrest by extending the height above the occupant's head. Seats may be made together with an attached, built in footrest or come with a separate matching ottoman. An ottoman is a short stool that is designed to be used as a movable footrest. Every now and then the ottoman could be mounted to a glider chair with swing arms, enabling the ottoman to rock back and forth together with the glider like a rocking chair together with a built-in footrest.

Seat covers are temporary textile covers for a seat which could offer protection against wear and add beauty. A large variety of seat covers from neoprene to leather are now offered. More formal materials could be rented for events like for example weddings to be able to enhance the decoration. Some seat covers have decorative seat ties or ribbons connected to be tied behind the seat in a decorative know or ribbon. Several people utilize custom-made clear plastic furniture covers to be able to protect their pricey seats and sofas.

Seat pads are cushions meant for seats, usually decorative; they could also be used in vehicles so as to increase the drivers' height. Orthopaedic backrests give support for the back, often in lumbar or lower spine area. A few producers have their seat pad designs patented and are recognized by some medical organizations. Some of the new car seats obtainable are outfitted with built-in and adjustable lumbar supports in order to offer added ease to passengers as well as drivers of the vehicle.
